

# FULFILLED DECANTERS TRAVEL CARE TIPS

## 1. Secure Packing for Transit:

a. When taking the decanters in your car to deliver to a client or exhibition, or when sending via courier, keep them tightly packed as delivered (cork lid secured, bubble wrap intact, and snugly fitted in the wooden gift box) to prevent movement or leakage.

b. Advise recipients to maintain this secure packing during their own travel by car or plane to ensure the decanter arrives safely.

## 2. Display and Handling:

a. Feel free to unwrap the decanters for display at events or client meetings to showcase their stunning design and logo.

b. After display, recipients should repack the decanter tightly in its box with the bubble wrap and cork lid secured before further transit.

## 3. Long-Term Enjoyment:

a. Once at their destination, the decanter can be proudly displayed in a liquor cabinet as a lasting memento of your brand.

b. Ensure the cork lid is checked periodically to maintain a tight seal if storing liquid beverage inside
